

## Topics in Number Theory In Honor of B. Gordon and S. Chowla Mathematics and Its Applications

By -

Springer. Paperback. Book Condition: New. Paperback. 264 pages. Dimensions: 9.5in. x 6.2in. x 0.6in. From July 31 through August 3, 1997, the Pennsylvania State University hosted the Topics in Number Theory Conference. The conference was organized by Ken Ono and myself. By writing the preface, I am afforded the opportunity to express my gratitude to Ken for being the inspiring and driving force behind the whole conference. Without his energy, enthusiasm and skill the entire event would never have occurred. We are extremely grateful to the sponsors of the conference: The National Science Foundation, The Penn State Conference Center and the Penn State Department of Mathematics. The object in this conference was to provide a variety of presentations giving a current picture of recent, significant work in number theory. There were eight plenary lectures: H. Darmon (McGill University), Non-vanishing of L-functions and their derivatives modulo  $p$ . A. Granville (University of Georgia), Mean values of multiplicative functions. C. Pomerance (University of Georgia), Recent results in primality testing. C. Skinner (Princeton University), Deformations of Galois representations. R. Stanley (Massachusetts Institute of Technology), Some interesting hyperplane arrangements. F. Rodriguez Villegas (Princeton University), Modular Mahler measures. T. Wooley (University of Michigan), Diophantine problems...

### Reviews

*It is fantastic and great. Sure, it is actually play, nonetheless an amazing and interesting literature. I realized this ebook from my dad and i recommended this pdf to find out.*

-- **Gunner Lang**

*Simply no phrases to explain. It is definitely simplistic but shocks from the fifty percent from the pdf. You may like the way the blogger write this ebook.*

-- **Antonetta Tremblay**
