

Investigation on Soil Pollution and the Relation of the Various Types Privies to the Spread of Intestinal Infections, Vol. 15 (Classic Reprint) (Paperback)

Filesize: 6.56 MB

Reviews

Good electronic book and valuable one. It generally is not going to charge an excessive amount of. Its been developed in an remarkably straightforward way and is particularly simply following i finished reading this ebook through which really transformed me, change the way i think.

(Mr. Domenic Eichmann)

INVESTIGATION ON SOIL POLLUTION AND THE RELATION OF THE VARIOUS TYPES PRIVIES TO THE SPREAD OF INTESTINAL INFECTIONS, VOL. 15 (CLASSIC REPRINT) (PAPERBACK)

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Investigation on Soil Pollution and the Relation of the Various Types Privies to the Spread of Intestinal Infections, Vol. 15 The pit privy marks a distinct advance over the open back type. The excreta are concentrated in a single hole and, if the seat fits tightly over the pit, it is comparatively free from flies. But although the possibility of fly distribution and spread by surface wash are greatly reduced, there remains the possible danger of subsoil pollution of the ground-water. The pail type represents an attempt to establish a privy free from any of the objections that apply to the pit privy. The excreta are collected into tight pails which are periodically collected and emptied. Theoretically it ought to be entirely satisfactory. Practically it falls far short of attaining the ideal. It requires too much attention, scavengers are careless, and it is not always fly-tight. The septic privy, or the wet system, is a definite departure from the dry types of closets described above. In all these types the liquefying bacteria are depended upon to disintegrate the solid feces and destroy the pathogens. The primitive leaching cesspool may be considered the empirical prototype. The main representatives of the modern varieties are the Lumsden-Roberts-Stiles (L. R. S.) privy and the Kentucky sanitary privy, of which there are several modifications in actual use. The L. R. S. privy consists of two barrels connected with a siphon, one receiving the excreta and constituting the septic chamber, the other receiving the effluent. The great objection to this system lies in the fact that the effluent in the second chamber must be frequently disposed of to prevent overflow. The...
