

Changing Destinies: The Re-Start Infant Family Programme for Early Autistic Behaviours (Paperback)

By -

KARNAC BOOKS, United Kingdom, 2016. Paperback. Book Condition: New. 230 x 147 mm. Language: English . Brand New Book. The term pre-autism is becoming more widespread as a result of growing awareness of the importance of a child's first three years of life in diagnosing behaviours which, if untreated, can develop into autism. In this book we are shown the problems parents can experience when their young child does not respond to them in a typical way, how they often voice concerns that something is not quite right with their child, and how it is important to address these concerns, which may be signs of pre-autism. This book is about a new approach called Re:Start, developed by Stella Acquarone, to diagnose and treat early autism. In the Re:Start infant/family programme, a multidisciplinary team works with the parents and through the family relationships to reconfigure dysfunctional dynamics with the aim to change destinies. In the first section of the book we learn about the up-to-date research in psychoanalysis, neurobiology, and paediatrics which underpin the Re:Start intensive programme. In the second section, the programme itself is described in three parts: assessment, therapy, and follow-on care continuing the progress made during treatment..
