# THE ECOLOGY AND EVOLUTION OF FLOWERS (PAPERBACK)

Oxford University Press, United Kingdom, 2007. Paperback. Book Condition: New. 244 x 188 mm. Language: English . Brand New Book. The reproductive organs and mating biology of angiosperms exhibit greater variety than those of any other group of organisms. Flowers and inflorescences are also the most diverse structures produced by angiosperms, and floral traits provide some of the most compelling examples of evolution by natural selection. Given that flowering plants include roughly 250,000 species, their reproductive diversity will not be...
