Excerpt: . . . 8 The Biology of Mental Disorders Figure 1-4 - PET Scan of an Individual the limbic system ( figure 1-4 ). The limbic system With Schizophrenia seems to be involved in the positive symptoms and the frontal cortex in the negative symptoms of schizophrenia. The precise interaction between these as well as the possible specific brain regions, involvement of other areas of the brain, still need to be clarified. In addition to pinpointing the regions and chemi-cals in the brain that underlie the symptoms of schizophrenia, researchers have put forward several hypotheses concerning the cause or causes of this disorder. Information about the course of schizo-phrenia, its epidemiology, and specific biological measures suggests that a virus or immune system problem is a possible culprit. Another hypothesis asserts that injury to the brain early in life is the critical factor. Support for this viewpoint stems from Brain activity in an individual who does not have...
