Original publisher: Hampton, Va. : National Aeronautics and Space Administration, Langley Research Center ; Springfield, Va. : National Technical Information Service, distributor, 1988 OCLC Number: ocm31262941 Subject: Artificial intelligence. Excerpt: . . . It-terms. delivers factored transfer function elements of all kinds denominators, numerators, coupling numerators, etc. Thus, vehicle equa- tions of motion, which typically involve second-order terms, are handled in naturally in the form which they were originally derived. Control system elements are also readily incorporated into the same structure. J LSMPs outputs include cell displays and matrix listings, transfer func-tion displays, frequency response Bode plots, and single-or multi-trace transient response plots. LSMP can provide transfer function files in Program CC format. While LSMPs specialized features make it the primary vehicle modeling task at STI, Program CC state space modeling capability is more than adequate for the present FCX development. C. PRELIMINARIES While theory and associated computational means are an important of aspect the design methodology, the lore, knowledge and experience ele-ments, which guide and govern applications are critical features. This material is presented here as summary tables, outlines, recipes, empirical data, lists, etc. , which encapsulate a great deal of expert knowledge. Much of this is presented in topical knowledge summaries which are attached to the report as Supplements. The composite of the supplements and the report main body elements constitutes a first cut at a Mark 1 Knowledge Base for manned-aircraft flight control. The steps in the design methodology are broadly outlined later in this introduction. help put flesh on this general skeleton the steps To are then illustrated in the next sections by a specific concrete example. This will consider a design point for a lateral-directional FCS for a high performance fighter....
